A Jain PharmaBiotech Report

AUTHOR'S BIOGRAPHY

Professor K. K. Jain is a neurologist/neurosurgeon with specialist qualifications including Fellowships of the Royal Colleges of Surgeons in Australia and Canada. He has trained, practiced and held academic positions in several countries including Switzerland, India, Iran, Germany Canada and USA. After retirement from neurosurgery, Prof. Jain remains a consultant in neurology. He is also working in the biotechnology/biopharmaceuticals industry and is a Fellow of the Faculty of Pharmaceutical Medicine of the Royal College of Physicians of UK. Currently, he is the CEO of Jain PharmaBiotech.

Prof. Jain's 490 publications include 35 books (6 as editor+ 29 as author) and 50 special reports, which have covered important areas in biotechnology, gene therapy and biopharmaceuticals, biomarkers: proteomics, molecular diagnostics, nanobiotechnology, and personalized medicine. Journal publications number 235: 68 on neurosurgical/neurological topics, 13 on hyperbaric medicine, and 154 on biotechnology/pharmaceutical medicine. Contributions to MedLink, an accredited continuing education program for neurologists, include 172 articles out of a total of 1250 articles by 450 authors. These articles are updated on a yearly basis.

His earlier books were the first in the area covered: "Handbook of Laser Neurosurgery" (Charles C. Thomas, Springfield, Ill, 1983) and "Textbook of Hyperbaric Medicine" (1st ed in 1990 and 6th ed by Springer, 2017). His "Textbook of Gene Therapy" was translated into Chinese in 2000. Recent books include "Handbook of Nanomedicine" (Springer 2008, Chinese edition by Peking University Press 2011, 3rd ed 2017), "Textbook of Personalized Medicine" (Springer 2009; Japanese ed 2012; 2nd ed Springer 2015, 3rd ed 2021), "Handbook of Biomarkers" (Springer 2010; Chinese ed, Chemical Industry Press 2016, 2nd ed 2017), "Drug-induced Neurological Disorders", 4th ed (Springer 2021), "Handbook of Neuroprotection" (Springer 2011, 2nd ed 2019), "Applications of Biotechnology in Cardiovascular Therapeutics" (Springer 2011), "Applications of Biotechnology in Neurology" (Springer 2013), and "Applications of Biotechnology in Oncology" (Springer 2014). He has also edited 3 editions of "Drug Delivery System" (Springer 2008, 20012 and 2018) and "Applied Neurogenomics" (Springer 2015). Currently, he is writing "The Handbook of Alzheimer Disease to be published by Springer in 2022.

TABLE OF CONTENTS

0. Executive Summary	13
1. Introduction to Animal Biotechnology	15
Introduction	15
Historical evolution of animal biotechnology	15
Basics of biotechnology	16
DNA	16
RNA	16
Genes.....	17
Single nucleotide polymorphisms	17
Copy number variations in the genome.....	17
DNA sequences.....	18
Gene expression	18
Gene regulation	19
Proteins	19
<i>Functions of proteins</i>	<i>20</i>
<i>Recombinant proteins.....</i>	<i>20</i>
Animal genetics	21
Molecular genetics	21
Twinning in cattle.....	21
Pig genetics.....	21
Genetic studies in dogs.....	22
Animal genomics	22
Avian genomes	22
<i>Chicken genome</i>	<i>22</i>
<i>Turkey genome.....</i>	<i>23</i>
The mouse genome.....	24
The cat genome.....	24
The dog genome.....	25
<i>Sequencing of the dog genome.....</i>	<i>26</i>
<i>Comparison of genomes of healthy and diseased dogs.....</i>	<i>27</i>
<i>Analysis of DNA copy number variation.....</i>	<i>28</i>
Marsupial genomes	28
Genome of the Tibetan antelope	29
Livestock genomics	29
<i>Bovine genome.....</i>	<i>30</i>
<i>Bovine SNP map</i>	<i>31</i>
<i>1,000 Bull Genomes Project</i>	<i>32</i>
<i>Bovine stomach microbiome genes.....</i>	<i>32</i>
<i>Camel genome</i>	<i>33</i>
<i>Goat genome.....</i>	<i>33</i>
<i>Horse genome</i>	<i>34</i>
<i>Pig genome.....</i>	<i>35</i>
<i>Sheep genome</i>	<i>36</i>
Fish genomes	36
<i>The Salmon genome.....</i>	<i>36</i>
<i>Genome of the Northern snakehead</i>	<i>38</i>
Whale genome	38
Genomes of non-human primates	39
<i>Chimpanzee genome</i>	<i>39</i>
<i>Genome of the rhesus macaque.....</i>	<i>39</i>
<i>Genome of gorilla</i>	<i>40</i>
Priority genome list of the National Human Genome Research Institute	40
Animal proteomics.....	41
Applications of proteomics in animals	41
<i>Caseins in goat milk</i>	<i>42</i>
<i>Lactic acid bacteria.....</i>	<i>42</i>
<i>Applications of proteomics in animal healthcare</i>	<i>42</i>
Bioinformatics	42
Biomarkers and animal health	44
Personalized medicine for pet animals.....	46
Monoclonal antibodies and animal health	46
Antigenomics.....	46
Nanobiotechnology and animal health.....	47
Stem cells and animal biotechnology	47
Rescuing extinct animals with stem cells.....	47
Animal biotechnology in relation to other technologies	48

2. Application of Biotechnology in Animals	51
Introduction	51
Applications of animal genomics.....	51
Bovine ankyrin 1 gene and beef tenderness	51
Chicken breeding based on genomics	52
Genomics of disease resistance.....	52
Genomic selection to exploit gene-environment interactions.....	52
Genome wide associations and milk production in cows	53
Low cost genotyping for genetic improvement in dairy cattle.....	53
SNPs and longevity in dairy cattle	53
Share genomic data to improve cattle breeding programs.....	54
Statistical genomics to improve breeding	54
Genetic engineering and gene editing.....	54
CRISPR/Cas9 gene editing in animals	54
Disease control by genetic engineering	55
Improvement of livestock by genetic engineering.....	55
Limitations and precautions for genetic engineering	55
Transgenic animal technology	55
Cloning animals	57
<i>Nuclear transfer technology.....</i>	<i>57</i>
<i>Nuclear bisection for cloning.....</i>	<i>58</i>
<i>Zona-free cloning method.....</i>	<i>59</i>
<i>Abnormalities in cloned animals.....</i>	<i>59</i>
<i>Cloning from embryonic cells.....</i>	<i>61</i>
<i>Cloning of rabbits.....</i>	<i>61</i>
<i>Cloning the rat</i>	<i>61</i>
<i>Cloning the horse.....</i>	<i>62</i>
<i>Cloning the cow</i>	<i>62</i>
<i>Cloning the dog</i>	<i>62</i>
<i>Cloning in primates</i>	<i>63</i>
Episomal vector-mediated gene delivery	63
Lentiviral transduction of male germ-line stem cells	63
Lentiviral transgenesis.....	64
Retrovector-mediated production of transgenic animals	64
Sperm-mediated gene transfer	64
Animal models of human diseases	65
Gene editing in large animals	65
Cloning of gene-edited dogs as models of human genetic diseases.....	67
Production of recombinant proteins.....	67
Transgenic pharmaceuticals	67
Proteins from the milk of transgenic animals	68
Advantages of milk as source of transgenic proteins.....	69
<i>Therapeutic proteins from rabbit milk</i>	<i>70</i>
<i>Recombinant human antibodies from cows.....</i>	<i>70</i>
<i>Therapeutic proteins from goat milk</i>	<i>71</i>
Chicken transgenesis for production of biopharmaceuticals.....	71
Concluding remarks about production of transgenic proteins in animals	72
Companies involved in production of transgenic pharmaceuticals	72
Transgenic food products	73
Milking genetically modified cows.....	73
Genetically modified fish	73
<i>Genetically engineered salmon</i>	<i>73</i>
<i>Gene transfer approaches to enhance growth of other fish species</i>	<i>74</i>
Cloned animals as sources of milk and meat.....	74
Animal feeds from transgenic plants	75
Transgenic modification of plants to increase nutritional value of animal feeds.....	75
Transgenic disease models	75
Technologies to create transgenic disease models	75
<i>Gene manipulation techniques.....</i>	<i>76</i>
<i>Embryonic stem cells for gene targeting</i>	<i>76</i>
<i>Homologous recombination</i>	<i>76</i>
<i>Transgenic animal models of human diseases.....</i>	<i>77</i>
Transgenic models for studying human drug metabolism and toxicity	78
The Human Genome Project and the role of transgenics	78
Genomic and proteomic analyses of transgenic animal models.....	79
Concern about health and welfare of transgenic animals	79
Safety of transgenic technology	80
Concluding remarks about use of transgenic animals	80
RNA interference technology	80
RNAi versus antisense	80
Applications of RNAi in animal biotechnology	81

Xenotransplantation	81
Pigs for xenotransplantation	82
<i>Genetically engineered pigs for transplants</i>	82
<i>Risks of xenotransplantation.....</i>	83
World Health Organization and xenotransplantation	83
Ethical aspects of animal biotechnology	84
3. A Biotechnology Perspective of Animals Diseases	85
Introduction	85
Infections in animals	85
Viral infections.....	86
<i>Avian viral infections</i>	86
<i>Avian influenza</i>	86
<i>Animal biotechnology implications of H1N1 influenza</i>	89
<i>Animal corona viruses and human SARS</i>	90
<i>Avian coronavirus</i>	90
<i>Acute lymphoproliferative disease of cattle.....</i>	91
<i>Bluetongue virus.....</i>	92
<i>Canine virus infections.....</i>	92
<i>Classical swine fever</i>	93
<i>Developing new treatments against FMD.....</i>	93
<i>Equine viruses</i>	94
<i>Feline virus infections.....</i>	95
<i>Foot-and-mouth disease</i>	95
<i>Porcine reproductive and respiratory syndrome virus.....</i>	97
<i>Rabies</i>	97
<i>Rinderpest</i>	98
<i>Schmallenberg virus.....</i>	98
<i>Virus infections in fishes</i>	99
Bacterial infections.....	99
<i>Bovine tuberculosis</i>	99
<i>Brucellosis</i>	100
<i>Mycoplasmal pneumonia</i>	100
Fungal infections.....	100
Protozoal infections	101
<i>Coccidiosis</i>	101
<i>Neosporosis</i>	101
<i>Toxoplasmosis</i>	102
<i>Trypanosomiasis</i>	102
Nematodes.....	102
Infections that cross the species barrier.....	103
Complications of bacterial infections and antibiotic use in animals	103
Transmissible spongiform encephalopathies (TSEs)	104
Inter-species transfer of prions.....	104
Scrapie.....	104
Bovine spongiform encephalopathy	104
<i>Epidemiology of BSE</i>	105
<i>Biomarkers in the urine of BSE infected cattle</i>	105
<i>Human health implications of BSE</i>	106
<i>Breeding animals protected against BSE</i>	106
TSE research.....	106
<i>Prion gene haplotyping</i>	106
<i>Pharmacological approaches to TSE research.....</i>	107
<i>Molecular diagnostic approach to TSE research.....</i>	107
<i>RNAi for knockdown of the bovine prion gene</i>	107
Chronic wasting disease	108
<i>Chronic wasting disease in wildlife.....</i>	108
<i>Chronic wasting disease of the cattle.....</i>	109
Genetic disorders in farm animals	110
Genetic predisposition to acquired diseases in animals	110
Overcoming limits of cancer chemotherapy in veterinary medicine	110
Diseases of pet animals	111
Canine anemia	111
Canine autoimmune diseases	111
Canine neuropsychiatric disorders.....	111
<i>Canine obsessive-compulsive disorder</i>	112
<i>Canine dementia.....</i>	112
<i>Canine epilepsy</i>	112
Canine glaucoma	113
Canine cardiovascular disease	113
<i>Heart failure.....</i>	113

<i>Cardiac complications of canine babesiosis</i>	114
Diabetes	114
<i>Role of biotechnology in management of diabetes</i>	115
Arthritis	115
Cancer in dogs.....	115
<i>Biotechnology-based anticancer therapeutics</i>	116
<i>Cancer clinical trials in dogs</i>	116
<i>Canine Comparative Oncology & Genomics Consortium</i>	117
Preventive veterinary medicine	117
Prevention of introduction of foreign animal diseases.....	117
Producing transgenic cattle resistant to BSE	118
Zoonotic diseases	118
Global impact of zoonotic diseases	118
Viruses that emerge in animals and spread to humans	119
<i>Borna virus</i>	119
<i>Nipah virus</i>	120
Collaborative management of animal and human health	120
Vaccines for zoonotic viral diseases	121

4. Molecular Diagnostics in Animals 123

Introduction	123
Nucleic acid technologies	123
The polymerase chain reaction	123
<i>Basic Principles of PCR</i>	123
<i>Target selection</i>	124
<i>Detection of amplified DNA</i>	124
<i>Real-time PCR systems</i>	124
<i>LightCycler PCR system</i>	125
<i>Molecular beacons</i>	125
<i>Applications of PCR in veterinary medicine</i>	125
Fluorescent in situ hybridization.....	126
Immunodiagnosics	128
Enzyme-linked immunoassays	128
Bovine Gamma Interferon Test	128
Antigen diagnosis of trichinosis.....	129
Parachek™ for the diagnosis of Johne's disease	129
Antibodies for differentiation between vaccinated and infected animals	130
Biochip/microarray technology	130
Applications of microarrays in animal biotechnology	131
<i>eSensor™ electrochemical biochip</i>	131
<i>FR 48 microfluidic biochip</i>	131
<i>SNPchiMp v.3 for standardizing livestock SNP data</i>	132
Biosensors	132
Immunosensors.....	133
<i>Biosensor for ovulation prediction in dairy cows</i>	133
Flow cytometry for animal diagnostics	134
Molecular imaging in animals	134
Veterinary cytogenetics	135
Applications of sequencing for veterinary diagnostics	136
Role of sequencing in detection of cancer biomarkers	136
DNA sequencing for study of bacterial epidemics	136
Role of sequencing in epidemic of Shiga toxin-producing <i>E. coli</i>	137
Role of sequencing in the study of genetic disorders in animals	137
Applications of molecular diagnostics in animals	138
Canine DNA testing	138
<i>Use and abuse of genetic testing of dogs</i>	139
Cat pedigree determined by gene tests.....	140
Diagnostic aids to selective breeding	140
<i>Selection of desirable traits</i>	140
<i>Gene variations and fat content of beef</i>	141
<i>Using genetic markers for improved milk production in dairy cattle</i>	141
<i>Application of bovine genomics for improving milk yield</i>	142
<i>Recognition of hereditary syndromes</i>	142
Genetic markers in animals	143
<i>SNP genotyping in animals</i>	143
<i>SNP genotyping for selective breeding of chicken</i>	143
Animal identity and parentage analysis.....	143
Animal species identification in food	144
Diagnosis of infections.....	144
<i>Bacterial infections</i>	144
<i>Diagnosis of fungal infections in animals</i>	145

<i>Diagnosis of viral infections</i>	145
<i>Molecular diagnosis of avian influenza</i>	147
<i>Molecular diagnosis of swine influenza</i>	148
<i>Diagnosis of parasitic infections</i>	148
<i>Detection of natural or bioterror threats to livestock</i>	149
<i>Detection of <i>Tritrichomonas foetus</i> DNA in cattle</i>	150
Molecular diagnosis of prion diseases	150
<i>Bovine spongiform encephalopathy</i>	150
<i>Testing for BSE in living animals</i>	152
<i>Prions in urine</i>	152
<i>Diagnosis of chronic wasting disease in wildlife</i>	152
Developing new tests for prion diseases	153
<i>Differentiation among various types of TSEs</i>	153
<i>Protein cyclic amplification</i>	153
<i>Antibody tests for prion diseases</i>	154
<i>Scrapie genotyping</i>	154
<i>A real-time ultrasonic method for prion protein detection</i>	155
Companies involved in developing molecular diagnostics for TSEs	155
Diagnosis of genetic disorders	156
<i>Genetic screening of companion animals</i>	156
<i>Genes associated with exercise-induced collapse</i>	156
<i>Preimplantation genetic diagnosis</i>	156
Diagnosis of cancer in animals	156
<i>Diagnosis of skin cancer</i>	157
<i>Diagnosis of canine mammary carcinoma</i>	157
Diagnosis of food-borne pathogens	157
Introduction	157
Molecular diagnostic methods used in food-borne infections	158
Detection of <i>Listeria</i> -contaminated foods	159
<i>Optical biosensor for detection of <i>Listeria</i></i>	159
<i>Real-time PCR for detection of <i>Listeria</i></i>	159
Detection of <i>Salmonella</i>	160
<i>MicroSEQ® <i>Salmonella</i> Detection Kit</i>	160
Detection of toxoplasmosis	160
<i>E. Coli</i> detection	160
<i>DuPont Bax system</i>	160
<i>MLG method for detection of multiple STEC strains</i>	161
<i>MicroSEQ® <i>E. Coli</i> Detection Kit</i>	161
<i>RapidFinder™ STEC</i>	161
A genomic approach to study of animal food-borne illness in humans	162
Limitations of use of molecular probes in food analysis	162
Companies with technologies for food pathogen detection	162
Biotechnology-based novel diagnostics for aquatic animals	163
Detection of chemicals in foods of animal origin	164
Companies developing molecular diagnostics for animals	164
5. Biotechnology-based Veterinary Medicine	167
Introduction	167
Biotechnology versus pharmaceutical products	167
Role of biotechnology in drug discovery and development	168
Biological therapies in veterinary medicine	168
Cost of veterinary vs. human drug discovery and development	168
Advantages and disadvantages of testing biotech products in animal models	169
Biotechnology-based antiparasitic drugs	169
Non-antibiotic strategies for control of infections in animals	169
Probiotics	170
<i>Potential role for probiotics in the human gut</i>	170
<i>Potential role for probiotics in animals</i>	170
<i>Probiotic bacteria for control of pathogens in cattle</i>	171
Nonantibiotic drugs for infections in animals	172
<i>Immunomodulation as an alternative to antibiotics in infections</i>	172
<i>Cathelicidins: effector molecules of mammalian innate immunity</i>	172
<i>Bacteriophage therapy for antibiotic resistance</i>	173
Biotechnology for treating tendon injuries	173
Use of growth factors to facilitate tendon injuries	173
Productivity enhancers	174
Bovine somatotropin for increasing milk production in dairy cows	174
Increasing milk production in cows by feeding propionibacteria	175
Use of growth factors	175
Transgenic plant products for use in animals	176
Biotechnology-based vaccines	176

Modern vaccines without viral non-structural proteins.....	177
Plant-derived vaccines for use in animals	177
Nano-bead vaccine adjuvant	178
Genetically engineered vaccines.....	178
<i>Application of nucleic acid vaccines in veterinary medicine</i>	178
DNA vaccines	178
DNA vaccine for tuberculosis	180
DNA vaccines for West Nile encephalitis.....	181
DNA vaccines for cancer	182
Gene-based vaccine for Marek's disease	182
Genetic engineering of live rabies vaccines.....	182
Genetically engineered vaccines for equine encephalitis.....	183
Genetically engineered vaccines for John's disease	183
Rational engineering of virus capsids to produce FMD vaccine.....	183
Vaccines against avian influenza	184
Vaccines against parasitic infections	185
Recombinant marker vaccines	185
Marker vaccines for foot-and-mouth disease.....	185
Marker vaccine for Newcastle disease	186
Vaccines for classical swine fever.....	186
Vaccines for tick control.....	187
Vaccination to protect swine from H1N1 influenza virus infection	187
Vaccination of cattle to prevent <i>E. coli</i> transmission to consumers in meat.....	187
Vaccines for bacterial equine respiratory infections.....	188
Use of RNAi to develop vaccines for viral infections in prawns.....	188
Companies developing biotechnology-based vaccines	189
Biotechnology in treatment of parasitic infections.....	189
Biotechnology in the treatment of CNS disorders in pet animals	190
Paraplegia due to acute spinal cord injury in dogs	190
Personalized approach to Niemann-Pick type C1 in cats	190
Role of biotechnology in veterinary oncology	191
Personalized management of dogs with high-grade B-cell lymphoma	191
VDC-1101 for treatment of lymphoma in dogs.....	191
Cell Therapy.....	192
Umbilical cord blood stem cells	192
Application of stem cells in veterinary medicine	192
Stem cells for repair of tendon injuries in horses.....	193
Stem cells for spinal cord injury in dogs.....	193
Stem cells for arthritis in horses	194
Gene therapy	194
Gene therapy vectors	194
Gene therapy by mitochondrial transfer	195
In utero gene therapy	195
Gene editing.....	195
Genome engineering by using TALENs	196
Genome editing by using CRISPR system	196
CRISPR system for creating animal models of human diseases.....	196
CRISPR-Cas9 system for producing tuberculosis-resistant cows	197
CRISPR-Cas9 for inactivation of pig retrovirus for xenotransplantation.....	197
Applications of gene therapy in veterinary medicine	197
Gene therapy for arthritis.....	198
Gene therapy for blindness in dogs due to Leber congenital amaurosis	198
Gene therapy for cardiomyopathy in dogs	198
Gene therapy for diabetes in dogs.....	199
Gene therapy for endocrine disorders	199
Gene therapy for hematological disorders	199
Gene therapy for inherited disorders of metabolism in dogs	200
Gene therapy to increase disease resistance.....	201
Gene therapy for infections	201
Gene therapy for renal failure.....	201
Cancer gene therapy	202
Antiangiogenic cancer gene therapy in dogs	202
Brain tumors in cats and dogs	203
Breast cancer in dogs.....	203
Canine hemangiosarcoma	204
Canine malignant melanoma	204
Canine soft tissue sarcoma.....	206
Melanoma in horses	206
Oncolytic virotherapy for cancer in dogs	206

6. Research in Animal Biotechnology 207

Introduction	207
Research institutes	207
Ethical issues of research in animal biotechnology	215
Future prospects.....	216
Genome wide association studies for investigation of declining fertility in cattle	216
Strategies for control of twinning in cattle.....	217
Future developments of molecular diagnostics.....	217
Future of vaccine application in veterinary medicine.....	217
<i>Promotion of innate immunity in animals</i>	<i>217</i>
<i>Identification of key parasite antigens for eliciting immune response</i>	<i>218</i>
<i>Virus-like particle vaccines for lasting immune response</i>	<i>218</i>
Control of respiratory virus infections	218
Control and prevention of bioterrorism diseases in animals	219
Genetic control of disease resistance	219
<i>Production of cattle lacking prion protein</i>	<i>220</i>
Application of genetics and biotechnology to wildlife management	220
Future of animal genomics	221
Future of in vitro meat production.....	221
 7. Animal Biotechnology Markets.....	 223
Introduction	223
Markets for biotechnology-based products for animal healthcare.....	224
Markets for biopharmaceuticals for animals.....	225
<i>Markets for recombinant proteins for animal healthcare</i>	<i>226</i>
<i>Markets for vaccines for animals</i>	<i>226</i>
Markets for animal diagnostics.....	226
<i>Test for bovine spongiform encephalopathy.....</i>	<i>226</i>
Markets for transgenic laboratory animals.....	227
Animal biotechnology markets according to therapeutic areas.....	227
Markets for biotechnology-based animal products for humans.....	227
Transgenic proteins.....	228
Market for xenotransplantation	228
Strategies for promoting use of animal biotechnology.....	229
Financial losses from death and disease in animals	229
<i>Losses in farm animals</i>	<i>229</i>
<i>Losses in poultry.....</i>	<i>229</i>
<i>Losses in equine industry.....</i>	<i>229</i>
The emerging role of pet owners.....	230
Improvement in cattle through application of biotechnology	230
<i>Economic aspects of genomic evaluation of dairy cattle</i>	<i>230</i>
<i>Pig market</i>	<i>230</i>
<i>Cattle Market.....</i>	<i>231</i>
<i>Poultry market.....</i>	<i>231</i>
<i>Milk from genetically modified cows.....</i>	<i>231</i>
Impact of biotechnology on fish markets.....	232
Role of biotechnology in livestock performance enhancer market.....	232
Gene transfer technologies.....	232
In vitro meat production and animal biotechnology markets.....	232
Cost-benefit aspects of transgenic proteins	233
<i>Lower costs of transgenic production</i>	<i>233</i>
<i>Lower costs of treatment</i>	<i>233</i>
Unmet needs in animal biotechnology	233
Future of animal biotechnology	234
Farm animals	235
<i>Global trends in epidemiology of livestock diseases</i>	<i>235</i>
<i>Genetic engineering of animals</i>	<i>235</i>
Companion animals.....	235
Animal molecular diagnostic markets.....	236
Future marketing status of animal-derived biotechnology products.....	236
 8. Regulatory issues	 237
Introduction	237
Regulatory agencies for veterinary biotechnology in the US.....	237
FDA regulatory issues in agricultural biotechnology	238
FDA guidelines on use of antibiotics in food-producing animals.....	239
FDA and veterinary stem cell therapy	240
Food safety evaluation of transgenic animals	241
Food from cloned animals	242
FDA investigation of drug transfer into eggs	243
Animal feed safety	244
Medicated feeds.....	245

Regulatory issues for production of transgenic proteins	245
Risks of animal biotechnology	245
FDA regulation of bovine products	246
Worldwide biotechnology regulatory and trade issues	246
9. Companies Involved in Animal Biotechnology	249
Introduction	249
Biotechnology at top veterinary pharmaceutical companies	249
Profiles of selected companies	249
Collaborations	346
10. References	349
