**November 2021**

**A Jain PharmaBiotech Report**

## ABOUT THE AUTHOR

Professor K. K. Jain is a neurologist/neurosurgeon with specialist qualifications including Fellowships of the Royal Colleges of Surgeons in Australia and Canada. He has trained, practiced, and held academic positions in several countries including Switzerland, India, Iran, Germany, Canada, and USA. After retirement from neurosurgery, Prof. Jain remains a consultant in neurology. He is also working in the biotechnology/biopharmaceuticals industry and is a Fellow of the Faculty of Pharmaceutical Medicine of the Royal College of Physicians of UK. Currently, he is the CEO of Jain PharmaBiotech.

Prof. Jain's 492 publications include 35 books (6 as editor + 29 as author) and 50 special reports, which have covered important areas in biotechnology, gene therapy and biopharmaceuticals. Books relevant to biotechnology and pharmaceuticals include "Role of Nanobiotechnology in Molecular Diagnostics" (2006), "Handbook of Nanomedicine" (Humana/Springer 2008; Chinese edition, Peking University Press 2011, 2nd ed Springer 2012, 3rd ed 2017), "Textbook of Personalized Medicine (Springer 2009; Japanese ed 2012; 2nd ed Springer 2015, 3rd ed 2021), "Handbook of Biomarkers" (Springer 2010; Chinese edition by Chemical Industry Press 2016, 2nd edition Springer 2017), "Handbook of Neuroprotection" (Springer 2011, 2nd ed 2019), "Drug-induced Neurological Disorders", 4th ed, Springer 2021), "Applications of Biotechnology in Cardiovascular Therapeutics" (Springer 2011), "Applications of Biotechnology in Neurology" (Springer 2013), and "Applications of Biotechnology in Oncology" (Springer 2014). He has edited "Drug Delivery to the Central Nervous System" (Humana/Springer 2010), "Drug Delivery Systems", 3rd edn (Springer 2019) and "Applied Neurogenomics" (Springer 2015). He has also written a "Textbook of Gene Therapy", which was the first book on this subject to be translated into the Chinese language. A book on gene therapy companies was published in 2000 by John Wiley & Sons. Updated material from both these books have been included in 2021 edition of a special report on Gene Therapy published by Jain PharmaBiotech Publications. Currently, he is writing "The Handbook of Alzheimer Disease" to be published by Springer in 2022.

## ABOUT THIS REPORT

The original report on Transdermal Drug Delivery appeared as a section in the author's Drug Delivery Systems published by Decision Resources Inc in 1998. The second edition was published by Informa Pharmaceuticals after detaching Cancer Drug Delivery and Central Nervous System Drug Delivery as separate reports in 2000. In 2002, Transdermal Drug Delivery was also detached, expanded, and updated to be issued as separate publications by Jain PharmaBiotech. The report was regularly updated since 2002, enlarged and rewritten for 2021 edition.

# TABLE OF CONTENTS

|  |           |
|--|-----------|
| <b>0. Executive Summary .....</b>  | <b>10</b> |
| <b>1. Basics of Transdermal Drug Delivery .....</b>                                      | <b>12</b> |
| <b>Introduction .....</b>  | <b>12</b> |
| Historical landmarks in transdermal drug delivery .....                                  | 12        |
| <b>Anatomy and physiology of skin .....</b>  | <b>13</b> |
| Skin metabolomics and transcutaneous passage of drugs.....                               | 13        |
| Transcutaneous absorption .....  | 14        |
| <b>Transdermal versus other methods of drug delivery.....</b>                            | <b>14</b> |
| Advantages of transdermal drug delivery .....  | 14        |
| <i>First-Pass Effect.....</i>  | <i>15</i> |
| Drawbacks of transdermal delivery.....   | 15        |
| <b>Factors that influence transdermal drug delivery .....</b>                            | <b>15</b> |
| Rate of permeation across the skin .....   | 16        |
| Properties of the skin .....   | 16        |
| Properties of drugs.....   | 17        |
| <i>The role of pH and pharmacokinetics .....</i>   | <i>18</i> |
| <i>Intradermal disposition of drugs after topical application.....</i>                   | <i>18</i> |
| Role of nanobiotechnology in understanding basis of transdermal delivery .....           | 18        |
| <b>2. Transdermal Drug Delivery Technologies .....</b>                                   | <b>20</b> |
| <b>Introduction .....</b>  | <b>20</b> |
| <b>Local application formulations .....</b>  | <b>21</b> |
| Crystalline topical formulations .....   | 21        |
| Microemulsions for transdermal drug delivery .....                                       | 21        |
| Nanoemulsions for transdermal drug delivery .....  | 22        |
| Transdermal gel technology .....   | 23        |
| Biphasic system.....   | 24        |
| <b>Penetration enhancers.....</b>  | <b>24</b> |
| Chemical enhancers .....   | 25        |
| <i>Nitric oxide-based transdermal drug delivery.....</i>                                 | <i>27</i> |
| Ionic liquids for transdermal delivery of drugs against bacterial biofilms on skin ..... | 27        |
| Vesicular transdermal carriers .....   | 27        |
| <i>Ethosomes.....</i>  | <i>27</i> |
| <i>Elastic vesicles for transdermal drug delivery .....</i>                              | <i>28</i> |
| <i>Liposomes.....</i>  | <i>28</i> |
| <i>Nanovesicles for transdermal drug delivery .....</i>                                  | <i>29</i> |
| <i>Transfersomes.....</i>  | <i>29</i> |
| <b>Transdermal patches .....</b>   | <b>31</b> |
| Adhesives for transdermal patches.....   | 32        |
| Commercial development of transdermal patches .....                                      | 33        |
| Innovations in transdermal patches.....  | 33        |
| <i>e-Patch™ controlled release micropump system.....</i>                                 | <i>34</i> |
| <i>Patchless Transdermal Delivery System .....</i>                                       | <i>34</i> |
| <i>Metered-dose transdermal system .....</i>   | <i>35</i> |
| <b>Polymers for transdermal drug delivery.....</b>                                       | <b>35</b> |
| Polymer membranes in transdermal patches .....   | 36        |
| Film forming polymeric solutions.....  | 36        |
| Crystal Reservoir System of Nitto Denko .....  | 37        |
| <b>Use of physical modalities to facilitate transdermal transport .....</b>              | <b>37</b> |
| Transdermal electrotransport .....   | 37        |
| Electroporation .....  | 38        |
| <i>Drug delivery by electroporation .....</i>  | <i>39</i> |
| Cryoelectrophoresis.....   | 40        |
| Iontophoresis .....  | 40        |
| <i>Iontophoresis compared with electrophoresis .....</i>                                 | <i>41</i> |
| <i>Application of iontophoresis for drug delivery .....</i>                              | <i>41</i> |
| <i>Patents in iontophoresis.....</i>   | <i>43</i> |
| <i>Companies with technologies for drug delivery by iontophoresis .....</i>              | <i>43</i> |
| Combination of electrophoresis and iontophoresis .....                                   | 44        |
| <i>Dermaportation .....</i>  | <i>44</i> |
| Radiofrequency-driven transdermal delivery.....  | 44        |
| Microporation .....  | 45        |
| Transcutaneous drug delivery by electropulsation .....                                   | 45        |
| Companies involved in electroporation-based drug delivery .....                          | 46        |
| Electrode Scanning System .....  | 46        |
| Use of electrostatic force in skin patch technology.....                                 | 46        |

|   |           |
|---|-----------|
| Multiple Absorption Kinetic System.....   | 47        |
| Transdermal drug delivery facilitated by heat .....                                 | 47        |
| <i>Thermosensitive gels</i> .....   | 47        |
| <i>Controlled, heat-aided drug delivery</i> .....                                   | 47        |
| Ultrasound .....  | 48        |
| Magnetophoresis.....  | 49        |
| Use of lasers for transdermal drug delivery .....                                   | 50        |
| <i>Laser-induced microporation</i> .....  | 50        |
| <i>Transdermal drug delivery by laser-induced pressure waves</i> .....              | 50        |
| <i>Transdermal drug delivery by laser-assisted changes in skin</i> .....            | 51        |
| Transdermal delivery by gas under pressure .....                                    | 51        |
| <i>Transdermal delivery with PowderJect gas gun</i> .....                           | 51        |
| <i>Microneedle assisted microparticle delivery by a gene gun</i> .....              | 52        |
| <i>Microscission induced by gas</i> .....   | 52        |
| <b>Role of microelectronics in transdermal drug delivery .....</b>                  | <b>53</b> |
| <b>Microneedles and dermal microinjection technologies.....</b>                     | <b>53</b> |
| Applications of microneedles .....  | 54        |
| AdminPatch® microneedle array.....  | 55        |
| Biodegradable microneedles.....   | 55        |
| Ceramic microneedle arrays .....  | 56        |
| Dissolvable microneedle patches.....  | 57        |
| MicorCor.....   | 57        |
| Microneedle arrays for drug delivery.....   | 58        |
| Microneedle patch .....   | 59        |
| MicroPyramid™ microneedles .....  | 60        |
| Microstructured Transdermal Systems .....   | 60        |
| Microneedle Array Patch technology .....  | 61        |
| <i>Patenting of microneedle transdermal drug delivery</i> .....                     | 61        |
| <i>Microneedle safety</i> .....   | 61        |
| Microneedle transdermal chip .....  | 62        |
| Microneedle applicator device .....   | 62        |
| Dissolving microneedles.....  | 62        |
| Nanoject™ microneedle technology .....  | 63        |
| Nanoneedle patch .....  | 64        |
| PatchPump.....  | 64        |
| Phase transtion nanoneedle.....   | 64        |
| Polymer microneedles .....  | 65        |
| Silk microneedles.....  | 65        |
| Vaccination for COVID-19 by microneedles.....                                       | 66        |
| Tattooing for drug delivery.....  | 66        |
